-!- INDUCTION: Expression is either up-regulated or down-regulated upon activation of the lymphoid tissues and this regulation may depend on the presence of IL-10 or IL-13.

-!- MISCELLANBOUS: Does not bind diphenhydramine, loratadine, ranitidine, cimetidine and chlorpheniramine. Shows modest affinity for dimaprit, impromidine, clobenpropit, thioperamide, burimamide clozapine, immepip and imetit. The order of inhibitory activity was imetit > clobenpropit > burimamide > thioperamide.

Clobenpropit behaves as a partial agonist, dimaprit and impromidine show some agonist activity while clozapine behaves as a full agonist. Thioperamide shows inverse agonism (enhances cAMP activity). The order of inhibitory activity of histamine derivatives was Histamine > N-alpha-methylhistamine > R(-)-alpha-methylhistamine > R(-)-alpha-methylhistamine behave as full
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Submitted (JAN-2001)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           O'Reilly M.A.;
"Identification of a histamine H4 receptor on human eosinophils in eosinophil chemotaxis.";
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     NUCLEOTIDE SEQUENCE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  absence of agonist).
SUBCELLULAR LOCATION: Integral membrane protein.
TISSUE SPECIFICITY: Expressed primarily in the bone marrow an eosinophils. Shows preferential distribution in cells of immunological relevance such as T-cells, dendritic cells, monocytes, mast cells, neutrophils. Also expressed in a wide variety of peripheral tissues, including the heart, kidney, Tanorrass, skeletal muscle, prostate, small intestine,

-i- SUBCELLULAR LOCATION: Integral membrane protein (By similarity).
-i- SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
EMBL; AY855070; AAW55866.1; -; mRNA.

IISSUE SpECIFICITY: Expressed widely and abundantly throughout the brain. Highly expressed in discrete neuronal populations such as brain. Highly expressed in discrete or cerebellar Purkinje cells. Byramidal cells in cerebral cortex or cerebellar Purkinje cells. SIMILARITY: Belongs to the G-protein coupled receptor 1 family.
                                                                                                                                                                                                              85
